PROFESSIONAL SUMMARY

Computer Science graduate from Lovely Professional University with experience in Java, Python, React.js, Django REST Framework, PostgreSQL, REST APIs, Docker, and Linux. Built full-stack applications including an AI-powered Intrusion Detection System, IPO Navigator AI, and Student Result Management System. Strong in Data Structures & Algorithms, OOP, and scalable software development, seeking Software Engineer or Full-Stack Developer roles.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) Lovely Professional University CGPA: 7.16	08/2023 – 06/2026 Phagwara, Punjab
Diploma Central Institute of Petrochemicals Engineering & Technology (CIPET) Percentage: 72%	06/2020 – 05/2023 Vijayawada, Andhra Pradesh
Secondary Education Triveni Public School Percentage: 98.83%	03/2020 Gudivada, Andhra Pradesh

TECHNICAL SKILLS

Programming Languages Java, Python, C++, SQL, HTML5, CSS3	Frameworks & Libraries React.js, Django REST Framework
Databases PostgreSQL	Developer Tools Git, GitHub, Docker, Linux, Google Sheets
Core Competencies Data Structures & Algorithms, Object-Oriented Programming (OOP), REST API Development, Full-Stack Web Development, Software Debugging, Problem Solving	Soft Skills Team Collaboration, Communication, Adaptability, Critical Thinking, Time Management

CERTIFICATIONS

Mastering Data Structures & Algorithms using C and C++ • Issuer: Udemy • Date: Aug 2023 – Oct 2023	Data Structures & Algorithms (Self-Paced) • Issuer: GeeksforGeeks • Date: Jun 2024 – Aug 2024
Building Web Applications in PHP • Issuer: Coursera • Date: Jun 2024 – Oct 2024	Introduction to Internet of Things • Issuer: NPTEL • Date: Jul 2024 – Oct 2024

ACHIEVEMENTS

Achievements • Participated in multiple national-level hackathons hosted through HackCulture, solving real-world software and fintech challenges. • Developed scalable full-stack applications using modern web technologies and RESTful APIs. • Continuously enhanced software engineering skills through technical projects, coding practice, and industry-recognized certifications.
--

PROJECTS

IPO Navigator AI: End-to-End SME IPO Preparation, Compliance & Trust Verification System • Developed an AI-powered platform to streamline SME IPO preparation, document management, compliance verification, and trust assessment. • Implemented secure user authentication, automated compliance workflows, REST APIs, and PostgreSQL for efficient data management. • Built a responsive React.js dashboard with AI-assisted document validation and status tracking to improve transparency and reduce manual effort.	2026 – Present
ScopSec (ScropIDS): Cloud-Native Intrusion Detection Platform • Developed a cloud-native Intrusion Detection System using Django REST Framework, React.js, PostgreSQL, and endpoint agents. • Built secure REST APIs for agent enrollment, event ingestion, and AI-assisted threat analysis using OpenAI-compatible APIs and Ollama. • Integrated real-time monitoring, log export, and Email, Slack, and Telegram notifications for efficient security event management.	01/2026 – 05/2026
Online Voting System • Built a secure online voting application with voter authentication, role-based access, election management, and automated result generation. • Designed a tamper-resistant voting workflow to ensure election integrity. • Achieved 96% system reliability during functional testing.	04/2025
